

NFPA 70E

SAFETY & COMPLIANCE

**THIS INFORMATIVE PROGRAM WILL TAKE THE MYSTERY
OUT OF THIS CONFUSING AND POTENTIALLY COSTLY STANDARD!**

DO YOU HAVE EMPLOYEES THAT:

- ⚡ **Work on or near live parts**
- ⚡ **Perform electrical maintenance**

**Then you must learn about NFPA 70E,
the Standard for Electrical Safety in
the Workplace.**

WHY YOU SHOULD:

This one-day program is designed specifically for those responsible for making decisions regarding employee safety and regulatory compliance. You will learn what NFPA 70E covers and why everyone is concerned about it. You will learn what options you have when you decide to implement 70E, and what resource commitments you should anticipate. There will be ample time for questions and answers. This may be the most important program you attend in a long, long time!

QUESTIONS YOU WILL HAVE ANSWERED:

- Is compliance with NFPA 70E mandatory?
- What are Arc-Flash Hazards and Shock Hazards?
- What is a Flash Hazard Analysis?
- Do your employees use the proper Personal Protective Equipment and Clothing?
- What are your options to reduce Risk levels?
- What is the Cost of Implementation?
- What are the Potential Problems with Implementation?
- What are the Benefits of Implementation?

DESIGNED FOR:

- Presidents and Vice-Presidents
- Managers - Operations and Maintenance
- Safety Directors and Compliance Officers
- Contractors
